

FUN PATCH SCAVENGER HUNT

The Instrument Families

Which family of instruments is generally played with a horsehair bow? **STRING**

Which family of instruments primarily uses valves to change notes? **BRASS**

In which family of instrument might a performer play 5 different instruments during one piece of music? **PERCUSSION**

Which family of instruments primarily uses reeds to create sound? **WOODWIND**

Individual Instruments

Which woodwind instruments are not made of wood? **FLUTE** and **SAXOPHONE**

Which percussion instrument is set up like a piano and has metal bars for keys? **BELLS, ORCHESTRA BELLS, GLOCKENSPIEL**

This instrument creates the best glissando with its slide rather than valves or keys. **TROMBONE**

This instrument is named for its shape. **TRIANGLE**

This instrument uses an end pin to keep it off the floor. **CELLO**

The violin has **4** strings.

This instrument is a circle of wood with metal discs attached. **TAMBOURINE**

This “instrument” is the most powerful in the orchestra, but it doesn’t make a sound! **CONDUCTING BATON**

The cello’s strings were once made of **ANIMAL GUTS**. Gross!!

Places in the Hall

These seats in the hall give concertgoers a bird's eye view of the music onstage. **BALCONY or MEZZANINE**

This location at the concert is not involved in making music but is really important if you want a seat! **TICKET BOOTH**

These are the passageways in which people are directed to their seats. **AISLES**

This side of the stage looks like the left to a concertgoer, but it is known as stage **RIGHT!**

These far edges of the stage are not visible to concertgoers but are very important for entrance and exits in the action! **WINGS**

Bonus!

During the concert, circle which instruments shown in the diagram are NOT in the Spooky Symphony concert this year.

This one was tricky! The instruments not in use in the Spooky Symphony were the alto flute, contrabassoon, and castanets!
